**5. Effective interest rate**

**The effective interest rate (EIR)** defines the total cost that the client will afford for the loan, including also interests, commissions and any other expenses that the client affords regarding the loan contract, within its conditions. For the purpose of calculating the EIR, the total cost does not include expenses that are not known at the time of the calculation, expenses to be paid by the customer in case of failure to comply with the terms stated in the contract, costs payable by the customer regarding the loan contract about third parties (for example, the notary, the Tax authority, the Real estate registration office) and any other expenses obligatory for the registrations and guarantees; expenses for insurance and/or guarantees not mandatory, expenses for commissions applied in case of unused funds and commission expenses for changing the contractual conditions. EIR will be calculated with the assumption that:

- the loan contract is valid for the maturity as agreed and
- the parties fulfill their obligations according to the conditions and date as given in the loan contract and
- the interest rate and other expenses that are included in the EIR calculation will remain unchanged (fix) till the end of the loan maturity.
