	 *In order to keep the same monthly installment the maturity of the loan will be decreased up to 140 months from the disbursement date. The maximum interest rate up to which changes of the maturity can be executed differs for different product categories For all the categories mentioned above the customers may choose to have life insurance premium or to take a higher interest rate of the loan. In case he chooses the latter, options are: If the customer is up to 45 years old, IR will be 0.5% higher than the applied interest rate for the respective category If the customer is over 45 years old, IR will be 1% higher than the applied interest rate for the respective category 				
5. Effective interest rate	The effective interest rate (EIR) defines the total cost that the client will afford for the loan, including also interests, commissios and any other expenses that the client affords regarding the loan contract, within its conditions. For the purpose of calculating the EIR, the total cost does not include expenses that are not known at the time of the calculation, expenses to be paid by the customer in case of failure to comply with the terms stated in the contract, costs payable by the customer regarding the loan contract about third parties (for example, the notary, the Tax authority, the Real estate registration office) and any other expenses obligatory for the registrations and guarantees; expenses for isurance and/or guarantees not mandatory, expenses for commissions applied in case of unused funds and commission expenses for changing the contractual coditions. EIR will be calculated with the assumption that:				

	 the loan contract is valid for the maturity as agreed and the parties fulfill their obligations according to the conditions and date as given in the loan contract and the interest rate and other expenses that are included in the EIR calculation will remain unchanged (fix) till the end of the loan maturity.
6. Loan amount and its currency	Maximal Loan Amount – Up to 50,000,000 ALL; 400,000 EUR Loan Currency – ALL / EUR
7. Loan contract maturity for Mortgage Loans	Maximal period for Home/ House Construction Loan ALL loans up to 12 years at disbursement date, adjustable up to 25 years according to 1Y T-Bill volatility. EURO loans up to 12 years at disbursement date, adjustable up to 20 years according to 1Y EURIBOR volatility
8.Loan disbursement	 As condition for loan disbursement, the borrower should open one or more current accounts at BKT, called "Loan Account", through which bank will make loan disbursement and the borrower will make installment repayment. Loan withdrawal will be done through: cash withdrawal, electronic withdrawal, issuing a Check from the client to the bank, payment-request by handwriting in favor of third parties. During the disbursement period, if the Bank determines that the borrower has not fulfilled the predetermined conditions as provided in the Loan Contract signed by both parts, Bank has the right in the resolving of this contract by associating with the repayment of the borrowed amount used up to that moment and also the relevant interest.
9. Number and frequency of payments	The loan repayment will be performed on equal monthly installments. The number of installments varies due to loan to maturity.
10.Loan's instalment amount	Installment = Principal amount + interest amount
11. Repayment schedule (repayment plan)	The revision of the base rate will be applied each 12 months for example Treasury Bill, so in all cases the interest rate formula for each customer will be revised in the 12 installment of the next year up to loan maturity.
